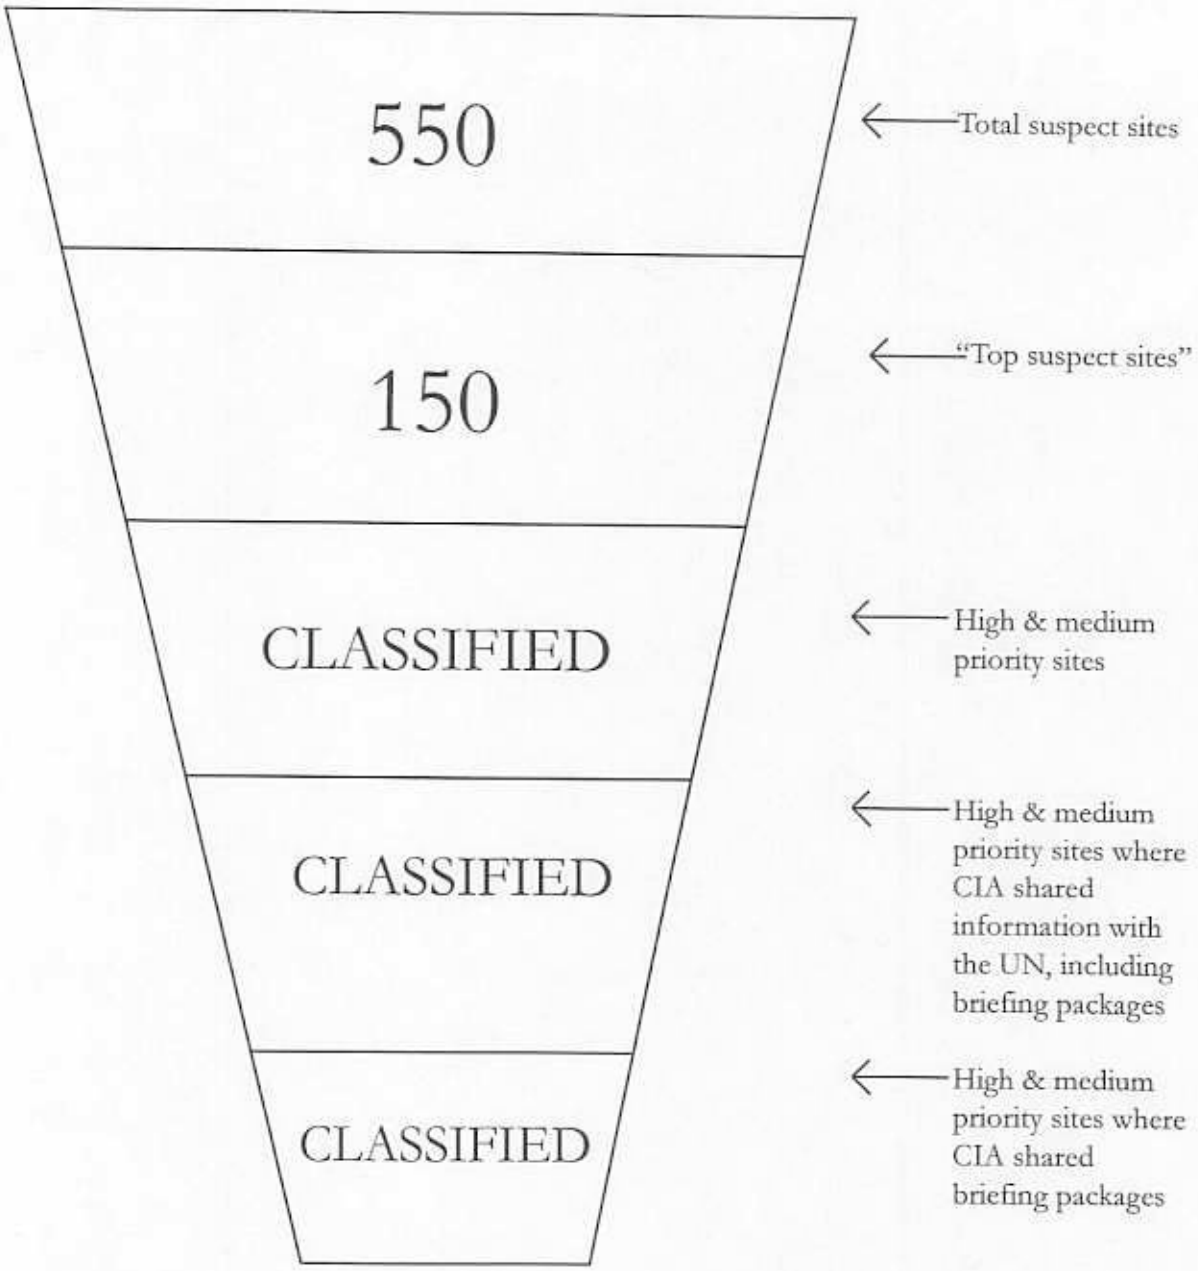
CIA's Sharing With United Nations of Intelligence on Suspect Weapons of Mass Destruction Sites in Iraq



Note: Numbers are not drawn to scale

Letter from DCI George Tenet to Senator Carl Levin
May 23, 2003

"Regarding declassifying the chart . . . we continue to have a close relationship with UN inspection organizations, including the IAEA, and confidentiality remains an important foundation of our maintaining successful relationships with international organizations. Dr. Blix has been quite reserved in his public comments on his various liaison relationships, respecting our secrecy arrangements, and we should abide by those understandings as well. By releasing data on our support for UNMOVIC we risk undermining our credibility with other international organizations with whom we continue to interact."

Letter from UNMOVIC Chairman Hans Blix to Senator Levin
June 11, 2003

"We would have no objection if it were made public how many site packages the CIA provided UNMOVIC between 31 December 2002 and 11 March 2003."

Testimony of DCI George Tenet at the
Open Senate Armed Services Committee Hearing
February 12, 2003

". . . we identified a specific number as being highest interest, highest value or moderate value because of recent activities suggesting ongoing WMD association or other intelligence information that we received. As I said yesterday, **we have briefed all of these high value and moderate value sites to UNMOVIC and IAEA."**

Statement for the Record
Letter from DCI George Tenet to Senator John Warner
March 6, 2003

"We have now provided detailed information on all of the high value and moderate value sites to UNMOVIC and the IAEA."

Letter from Condoleezza Rice
Assistant to the President for National Security Affairs to Senator Carl Levin
March 6, 2003

"United Nations inspectors have been briefed on every high or medium priority weapons of mass destruction, missile, and UAV-related site the U.S. Intelligence Community has identified."
