Individual Reflection: Past Engaged Effort

Instructions

Select **one specific** public engagement project, initiative, or experience that you've had and answer the questions below about this past engaged effort. We are defining public engagement broadly - including engagement such as school outreach programs, community-engaged courses, public lectures, or working to change policies based on your scholarship. Be prepared to describe this effort to a partner.

1. **Briefly** describe this public engagement project, initiative, or experience:
    a. With whom did you work as part of this engaged effort, including both public/non-academic and academic individuals or groups?
    b. What were the goals of this past engaged effort?
    c. What did you actually do as part of this engaged effort (e.g. activities or deliverables)?

2. Select one of the **public/non-academic** individuals or groups that you worked with and describe some of the dynamics of this relationship. How might this relationship be described within the IAP2 spectrum?

3. Looking at this past engaged effort as a whole, where might it be situated in the PReP pathways? On the UCD Avocado?

4. From your perspective, was this past engaged effort successful? Why or why not, and how do you know?

5. Describe one thing that you learned about public engagement more broadly through this experience.
