CEE538 Computer-Aided Project Management

What is Bluebeam Revu?

- Bluebeam Revu is a PDF file editor that is designed primarily for working with construction documents. The company Bluebeam claims that Revu is used by 99% of top US contractors and 92% of top design-build firms.
- Bluebeam Revu is particularly useful for
    - Annotating PDF documents, and for copying, cutting, and pasting content in PDF documents.
    - It can also be used to add, remove, rearrange, and combine pages in PDF documents.
    - Moreover, the installation of Bluebeam Revu creates a new printer in Windows that allows any Windows application (such as Primavera P6 or Microsoft Project) to print its output and create new PDF files.

How can I install Bluebeam Revu on my own Windows computer?

- Bluebeam has an Academic Program that grants a license to university students to install Bluebeam Revu on their own personal Windows computers

- To obtain a free license and install Bluebeam Revu 20 on your own Windows computer, start here:
    - https://www.bluebeam.com/community/academic/

- IMPORTANT: Do not share your license key with anyone else. Doing so would be a violation of the agreement with Bluebeam and would also be a violation of the College of Engineering Honor Code.
