## Latest Developments

### HHS Funds Substance Abuse Treatment in Health Centers

Last week the Department of Health and Human Services (HHS) announced approximately $94 million in funding for health centers in 47 states and territories to improve and expand opioid and heroin abuse services. The funding, administered through the HHS Health Resources and Services Administration, will allow health centers to increase the number of patients with access to medication-assisted treatment for opioid use, provide informed prescribing training to health officials and increase the number of patients screened for substance use disorders. HHS anticipates the funding will help awardees hire approximately 800 providers and treat 124,000 new patients. For a full list of states receiving funding, click here.
