Growth. Opportunity. Leadership.

Did You Know?

In Iowa, consumers saved ***$1.6 million in two days*** when the state's 5 percent sales tax was temporarily lifted on clothing and footwear. Imagine the savings from a permanent cut of import taxes on clothes and shoes that average 15-25%!

The Back-To-School Tax

Across America, parents are paying steep import taxes on back-to-school items. These hidden taxes--buried in the cost of imported goods--can be three, four or even five times higher than the state sales tax. New trade agreements could save the average family $1,100 per year in such taxes.

Cut The Back-To-School Tax.
