The Advanced Specialty Education Program in Orthodontics and Dentofacial Orthopedics

Commendations

"The program director and full- and part-time teaching staff are commended for their dedication and responsibilities to the graduate program and its residents, along with their organizational skills and experience."

"The visiting committee noted that the program facilities are excellent for clinical, academic, and research activities. The program is commended for its spacious state-of-the-art facilities and resources."

Among the School's most spacious state-of-the-art facilities and resources are those in the Robert W. Browne Orthodontics Wing. Graduate orthodontics resident Dr. Christopher Freeman (right) discusses a patient treatment plan with Dr. Richard Johnson (center) and Dr. Christopher Roberts (left).
