The Advanced Specialty Education Program in Periodontics

Commendations

"The advanced specialty education program in periodontics is commended for its research and scholarly activities."

"The program director is commended for his administrative skills, the quality of the educational program, and the achievements of the residents."

Dr. Hom-Lay Wang (right), director of the School of Dentistry's graduate periodontics program, Dr. William Giannobile (left), and Dr. Ricardo Gapski, a graduate periodontics student, review a patient's x-rays as they plan an advanced sinus grafting procedure. The technique lifts the sinus floor to create sufficient bone height for future implant placement.
