

Organogenesis Training Grant Application for Mentorship Role

Name _____ Rank _____

Departmental address: _____

1. Which of the three focus areas describe your research interests? (check one or more)
☐ a) Organ Development
☐ b) Organ/Tissue Maintenance and Replacement
☐ c) Abnormal Organ Growth
☐ d) Artificial Organ Systems
2. Attach an NIH-style (2 page) Biosketch. Circle any publications that pertain directly to these focus areas. If copies of any of these references were submitted with your application to the Center for Organogenesis (CFO), please indicate so here. Please provide your current IRB and UCUCA numbers and approval dates.
3. Describe how your present research program fits into one or more of the above focus areas. If you think that you have done this in the context of your Organogenesis application, please refer us to that statement.

4. Synopsis of training record. List all present and past students and postdocs who have been trained in your laboratory, their previous degree(s) and where obtained, and the years they were in your lab. Indicate those who were trained in areas directly related to organogenesis (e.g., with bold type). Also indicate where these trainees have gone since leaving your lab. For graduate students, list their training program. For postdocs, indicate which have received postdoctoral funding (give source).
5. Provide a one or two sentence summary of your research program, emphasizing those scientific aspects which make your lab an attractive place for trainees.
6. Indicate other U/M faculty members with whom you are presently collaborating or will soon be collaborating. List any grants or publications that have resulted from these collaborations. List any trainees (students or postdocs) who have been involved in the collaborative research.
7. List other training grant programs in which you participate. List other Centers and Program Projects with which you are involved. (If this information is in your CFO application, indicate as such).
8. Attach an up-dated, NIH-style Other Support Page, which lists your active and pending research grants including the current Annual Direct Cost Budget.
