Asset Management Maturity Self-Assessment

How Do You Measure Up?

Webinar: Tuesday, February 20, 2018 – 9:00-11:00 a.m.

Michigan's local government agencies have been implementing infrastructure asset management principles for decades on their road networks, drinking water systems, storm, and sanitary sewer systems. Private utilities that provide services like power, gas, and telecommunications have also adopted these principles. But, how are we managing our assets on a statewide level? And, how does your agency compare to the rest of the state for the different infrastructure you own?

This webinar will guide infrastructure owners through the process of an asset management maturity self-assessment. During the webinar, attendees will have an opportunity to see how they compare to the rest of the state with real-time feedback to their anonymous self-assessment. They will not only learn about asset management resources but will also be able to suggest resources that can help Michigan institutionalize asset management best practices.

Plus, your participation matters! Anonymous data from the self-assessment conducted during this webinar will be used to assist the Governor's office in assembling policy and planning for future asset management initiatives in Michigan. Help create Michigan's future!

Register today at ctt.nonprofitsoapbox.com/2018-ammsa.

Angela Ayers
Director of Strategy

Benefits of participating in this webinar:

- Learn how to perform an asset management maturity assessment in your own organization.
- Compare your anonymous maturity data with similar agencies.
- Use results to help build your own asset management program.
- Help guide the Governor's office in its asset management legislation and/or programs.

Who should attend?
This webinar is for Michigan local government agencies that own drinking water, sanitary sewer, storm sewer, and/or transportation infrastructure, and for private utilities providing Michigan residents with such services as power, gas, and telecommunications. It will be especially beneficial for communities that have representatives managing each class of infrastructure and/or utility. Interested in personnel must register at ctt.nonprofitsoapbox.com/2018-ammsa; there is no fee to attend.

Presenters
Gareth Lifton, PE, is a managing director for KPMG, LLP. Lifton works with municipal and private clients worldwide in developing and implementing their asset management programs. He is currently assisting the State of Michigan Governor's office with developing and managing its statewide infrastructure asset management pilot study.

Tim Colling, PhD, PE, is the director of the Center for Technology & Training at Michigan Technological University. His expertise and focus is in asset management and asset management systems. Colling is primarily involved in outreach and technical support to infrastructure owners.
