Atten: Senator Joseph Knollenberg

I would like to know what the government is going to do about rising gas prices. Shell Oil company is selling regular gas in metro Detroit for $3.89 per gallon. Put a freeze on it before it goes up to $15.00 per gallon. President Bush will do nothing about it because he wants to take care on his buddies that own refineries. We must stop dependency of oil from the OPEC nations!

I recommend as follows:

1. Like World war 11 request shopping malls to reduce their hours. Give a tax break for offices and factories to install energy saving devices. I know the big three do and save millions of dollars.

2. Shut down mail service on Saturdays.

3. In Las Vegas have the hotels shutdown parts of their lights.

4. In California there should be atomic energy plants.

5. Purchase out oil from South America and Mexico.

6. Instead of shipping all the oil from Alaska to Japan refine it for United State.

7 Encourage off shore drilling.

8, Re-activate the railroad system with high speed trains.

8, Re-activate the railroad system with high speed trains.

9. Do research on use of coal that will reduce pollution.

10. Mandate 60 mile an hour on speed limit on federal highways.

I want to thank you for reading this letter. May I hear from you.

Sincerely,

Harold Strauss
