EBINDIV

Congressman Joe Knollenberg (R - MI)
2349 Rayburn House Office Building
Washington, DC 20515

Dear Congressman Knollenberg

The emissions bill using emissions "cap and trade" should be D.O.A. It is time to get back to the real world! China is causing and adding more greenhouse gases each DAY then the USA removes. The local environmentalist has caused no drilling for more local oil and raised the cost of all food due to corn for gasoline. The United States government non energy policy is killing the economy.

The cleaning of the environment is good if done the right way. Minority groups are running the government agenda. Government should be making life better for the Majority of the citizens in this country. The emissions bill is a cost no country can bare and it will not do the job!

The environmentalist and fishing clubs have stopped the building of dams and coal generating plants and the removal of many. More Hydro plants with fish ladders would not have any emissions. Nuclear plants are not being built due to environmentalist! It is time for the US to make plans for the real world.

The special interest groups, lobbyists have more power than the majority which is not what government is all about. The recording industry has made deals with the builder of dvd recorders to make equipment not work unless a code is in the dvd . Where is the FCC?

Corporations in Wind and Solar have form so called green organizations to push State governments to pass bills for Solar and Wind energy at what cost to the public?

The subsidy for so called farmers should be for the small farmer, not corporations

The subsidy for the oil group, PLEAASE don't make me cry!

Remove the money set aside for Teapots, Toilet seats and other PORK!

I am upset with both parties in both the Senate and House! Government is supposed to represent the citizens of this great country, not the party line and special interest groups!
PASS A REAL ENERGY BILL AND GET REAL ABOUT EMISSIONS!

Regards:
Robert E. Winter

171 W. Lovell Dr.
Troy, MI 48098
