EBINDI V

Dear Joseph Knollenberg,

My name is Zachary Kourtakis, and I am a resident of Troy, Michigan and am 14 years old. My reason for writing you this letter is to inform of a hidden national crisis known as the Federal Reserve System. Despite common understanding, the FED is not a government owned or operated company. The FED is simply a privately owned bank made only to gain profit.

Over history, they have ~~paid~~ pumped money into our economy causing a bloom in our economy than retrieving it, causing recession. Right now, we are in the beginning of the recession.

If the FED were nonexistent, the economy could run on earning wages and the spending of those wages on goods. Many people have put forward bills to abolish the Federal Reserve such as Ron Paul, but they have all been pushed aside. The reason is that not many people don't know about this crisis, and many who do care or can not do anything about it. So please be one that does something.

Sincerely yours,

Zachary Kourtakis
