Dear Representative Knollenberg *HR4379

Too many Constitutionally-defiant Federal judges act to overrule the Constitutionally-protected rights of the States and we the people of the States.

These judicial supremacists seem determined to impose from the bench an agenda that is in clear conflict with our Constitutional rights.

This can be stopped by immediate passage of the "We the People Act" – – – a bill crafted by Congressman Ron Paul to limit the jurisdiction of the Federal courts.

I urge you to cosponsor and support this vital pro-liberty bill the minute it is voted on in the United States House of Representatives.

Respectfully: Ray Eland
