USINOJ Get At&t M-F 7AM-10PM E.S.T. 800-222-0300

Hello Joseph;

This certainly is a widespread problem unlike the concern I wrote to you about before. At&t claims they have to increase your bills cause of low income people and internet services for public use especially in rural areas they claim. They been billing people a ① Universal Connectivity Charge and ② Carrier Cost Recovery fee and ③ Minimum Use fee as they claim they have to by F.C.C. law. 800-332-2221

Also been payng for voice mail by ICI Teleservices 800-433-4518 on my At&t bill. Never asked for voice bill and yet I get a $4.61 bill for that on my At&t bill.

(turn over)

With the 3 charges by At&t with a Universal fee, a Recovery fee and a min. Usage fee thats $14.61 on my At&t bill to help the poor and help people have the internet. At&t's excuse is [redacted] that the F.C.C. requires them to bill this to their customers

Should be government grant money to help the poor and communities have the internet for public usage not the customer doing it with higher phone bills.

Should have the F.C.C. be banned from doing this foul style of business. Hope you correct the problem if elected you back in office.

Write back soon,

Thanks Tony
