The Honorable Joe Knollenberg
2349 Rayburn House Office Building
Washington, DC 20515-2211

Dear Congressman Knollenberg:

I am writing in support of legislation to repair and rehabilitate the nation's bridges, and fund the construction of roads. Preventing the funding for our nation's infrastructure has caused the deterioration of major highways and bridges around the state.

It is time to take action in order to avoid the damage of our infrastructure. In support to this issue, our nation's infrastructure has received a grade of C or less by the American Society of Civil Engineers. It is important to prevent further damage; if not, the repairs and rehabilitations are going to be expensive.

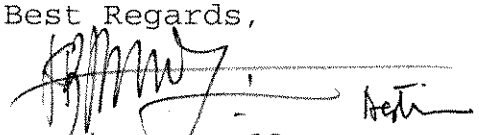

We will be appreciative if you can support the legislation to create the National Infrastructure Reconstruction Program when it will be introduced in the House of Representatives.

The support of this program will fund the repair, rehabilitation and rebuilding of our different highways and bridges.
Also, the support of this legislation will create the maintenance program, which decides when projects should be selected for rehabilitation.

Moreover, please support any transportation funding to be increased for the 2008 fiscal year.

I believe this is the way to solve this important matter.

Best Regards,
