

LECTURE

APRIL 8, 6:30 P.M.

WALTER HOOD

University of California, Berkeley / Hood Design

Walter Hood is the principal of Hood Design which he established in 1992, in Oakland, California. The firm is committed to issues that address the re-construction of urban landscapes within towns and cities. Hood Design's approach is multi-dimensional, exploring the role of specific landscape typologies and topologies that together reinforce and re-make landscapes that are specific to place and people. Hood is a professor and former chair of the Landscape Architecture and Environmental Planning program at the University of California, Berkeley. His area of teaching and research, American urban landscape history and design, is intertwined with office practice creating a didactic approach to projects. Hood's projects include the landscape for the de Young Museum in Golden Gate Park, San Francisco and Poplar Street, a green boulevard in the heart of downtown Macon, GA.
